

TABLE 8**Minimum Levels of Service for Roads and Highways**

Facility	Overall Travel Speed During Peak Travel Conditions
-----	-----
Major and Minor Arterials	50-55 MPH
Major Collector Roads	45-50 MPH
Minor Collector Roads	40 MPH

For driver convenience, ease of operations, and safety, it would be desirable to widen all existing roads and highways to provide a minimum lane width of 12 feet. However, when considering overall statewide needs and the available highway revenue, it is found that these levels of improvement applied statewide would be impractical. Therefore, it is necessary to establish minimum tolerable widths for existing roads with respect to traffic demands that would be economically feasible. The widths used in determining the existing lane deficiencies in the County are given in Table 9.

TABLE 9**Minimum Tolerable Lane Widths (in feet)**

ADT	Principal Arterials	Minor Arterials	Collectors
-----	-----	-----	-----
over 2,000	11	11	11
400 - 2,000	-	10	10
100 - 400	-	10	9
below 100	-	-	9
